#### NOTE 1 Summary of Significant Accounting Policies and Going Concern

#### A. Accounting Practices

The financial statements of Citizens Insurance Company of the Midwest ("the Company") are presented on the basis of accounting practices prescribed or permitted by the State of Indiana Insurance Department.

The State of Indiana Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of Indiana for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Indiana Insurance Law. The National Association of Insurance Commissioners ("NAIC") "Accounting Practices and Procedures Manual" ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Indiana. The State has not adopted any prescribed accounting practices that differ from those found in NAIC SAP.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Indiana is shown below:

#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

#### C. Accounting Policy

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds not backed by loans are stated at either amortized cost or fair value, using the scientific interest method, in accordance with the NAIC Purposes and Procedures of the Securities Valuation Office.
- (3,4) The Company does not own any preferred or common stocks.
- (5) The Company does not own any mortgage loans.
- (6) Loan-backed securities are stated at either amortized cost or fair value, in accordance with the NAIC Purposes and Procedures of the Securities Valuation Office.
- (7) The Company does not own any stocks of, or have any interest in, any subsidiaries.
- (8) The Company does not own any other invested assets.
- (9) The Company does not own any derivatives
- (10) The Company does utilize anticipated investment income as a factor in the premium deficiency calculation.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported ("IBNR"). Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy from the prior year.
- (13) The Company does not write major medical insurance with prescription drug coverage.
- D. Going Concern

#### NOTE 2 Accounting Changes and Corrections of Errors

Not applicable

### NOTE 3 Business Combinations and Goodwill

Not Applicabale is intended

### NOTE 4 Discontinued Operations

#### NOTE 5 Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

The Company does not own any mortgage loans.

B. Debt Restructuring

The Company did not have any restructured debt.

C. Reverse Mortgages

The Company does not own any reverse mortgages.

- D. Loan-Backed Securities
  - (1) Prepayment assumptions for loan-backed and structured securities were obtained from prepayment models that are sensitive to refinancing, turnover, equity take-out and other relevant factors. These assumptions are consistent with the current interest rate
  - (2) Not applicable
  - (3) The Company had no securities with a recognized other-than-temporary impairment.
  - (4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):
    - a) The aggregate amount of unrealized losses:

 1. Less than 12 Months
 \$ 3,508

 2. 12 Months or Longer
 \$ 17,039

b) The aggregate related fair value of securities with unrealized losses:

 1. Less than 12 Months
 \$ 786,022

 2. 12 Months or Longer
 \$ 534,278

(5) The Company employs a systematic methodology to determine if a decline in market value below book/adjusted carrying value is other-than-temporary. In determining whether a decline in fair value below book/adjusted carrying value is other-than-temporary, the Company evaluates several factors and circumstances, including the issuer's overall financial condition; the issuer's credit and financial strength ratings; the issuer's financial performance, including earnings trends, dividend payments, and asset quality; any specific events which may influence the operations of the issuer including governmental actions; a weakening of the general market conditions in the industry or geographic region in which the issuer operates; the length of time and degree to which the fair value of an issuer's securities remains below cost; the Company's intent and ability to hold the security until such time to allow for the expected recovery in value; and with respect to fixed maturity investments, any factors that might raise doubt about the issuer's ability to pay all amounts due according to the contractual terms. These factors are applied to all securities.

#### NOTE 20 Fair Value Measurements

A.

- (1) Fair Value Measurements at Reporting Date
  - a. There were no assets carried at fair value at the end of the reporting period.
  - b. There were no liabilities carried at fair value at the end of the reporting period.
- (2) The Company does not have any Level 3 assets or liabilities measured at fair value at the end of the reporting period.
- (3) The reporting entity's policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that caused the transfer.
- (4) For fair value measurements categorized within Level 2 of the fair value hierarchy, fair values of bonds are obtained by a quoted market price if available, otherwise, fair values are estimated using independent pricing sources or internally developed pricing models using discounted cash flow analyses.

The Company utilizes a third party pricing service for the valuation of the majority of its fixed maturity securities and receives one quote per security. When quoted market prices in an active market are available, they are provided by the pricing service as the fair value and such values are classified as Level 1. Since fixed maturities other than U.S. Treasury securities generally do not trade on a daily basis, the pricing service prepares estimates of fair value for those securities using pricing applications based on a market approach. Inputs into the fair value pricing applications which are common to all asset classes include benchmark U.S. Treasury security yield curves, reported trades of identical or similar fixed maturity securities, broker/dealer quotes of identical or similar fixed maturity securities and structural characteristics of the security, such as maturity date, coupon, mandatory principal payment dates, frequency of interest and principal payments and optional principal redemption features. Inputs into the fair value applications that are unique by asset class include, but are not limited to:

- U.S. government determination of direct versus indirect government support and whether any contingencies exist with respect to the timely payment of principal and interest.
- All other governments estimates of appropriate market spread versus underlying related sovereign treasury curves dependent on liquidity and direct or contingent support.
- Corporate bonds, which are included in Industrial and miscellaneous bonds overall credit quality, including assessments of the level and variability of: economic sensitivity, liquidity; corporate financial policies; management quality; regulatory environment; competitive position; ownership; restrictive covenants; and security or collateral.
- Municipal bonds, which are included in States, territories and possessions; Political subdivisions of states, territories and possessions; and Special revenue
  and special assessment obligations overall credit quality, including assessments of the level and variability of: sources of payment such as income, sales
  or property taxes, levies or user fees; credit support such as insurance; state or local economic and political base; natural resource availability, and
  susceptibility to natural or man-made catastrophic events such as hurricanes, earthquakes or acts of terrorism.
- Residential mortgage-backed securities, U.S. agency pass-thrus and collateralized mortgage obligations ("CMOs") which are included in U.S. governments and Special revenue and special assessment obligations estimates of prepayment speeds based upon: historical prepayment rate trends; underlying collateral interest rates; geographic concentration; vintage year; borrower credit quality characteristics; interest rate and yield curve forecasts; government or monetary authority support programs; tax policies; and delinquency/default trends.
- Residential mortgage-backed securities, non-agency CMOs, which are included in Industrial and miscellaneous estimates of prepayment speeds based
  upon: historical prepayment rate trends; underlying collateral interest rates; geographic concentration; vintage year; borrower credit quality characteristics;
  interest rate and yield curve forecasts; government or monetary authority support programs; tax policies; delinquency/default trends; and severity of loss
  upon default and length of time to recover proceeds following default.
- Commercial mortgage-backed securities, which are included in Industrial and miscellaneous bonds overall credit quality, including assessments of the
  value and supply/demand characteristics of: collateral type such as office, retail, residential, lodging, or other; geographic concentration by region, state,
  metropolitan statistical area and locale; vintage year; historical collateral performance including defeasance, delinquency, default and special servicer
  trends; and capital structure support features.
- Asset-backed securities, which are included in Industrial and miscellaneous bonds overall credit quality, including assessments of the underlying
  collateral type such as credit card receivables, auto loan receivables and equipment lease receivables; geographic diversification; vintage year; historical
  collateral performance including delinquency, default and casualty trends; economic conditions influencing use rates and resale values; and contract
  structural support features.

Generally, all prices provided by the pricing service, except actively traded securities with quoted market prices, are reported as Level 2.

The Company holds privately placed corporate bonds and certain other bonds that do not have an active market and for which the pricing service cannot provide fair values. The Company determines fair values for these securities using either matrix pricing or broker quotes. The Company will use observable market data to the extent it is available, but is also required to use a certain amount of unobservable judgment due to the illiquid nature of the securities involved. Additionally, the Company may obtain nonbinding broker quotes which are reported as Level 3.

6.1	What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?  The Company cedes 100% of its business to The Citizens Insurance Company of America (CICA). CICA maintains workers' compensation coverage under its casualty excess of loss reinsurance agreement.			
6.2	Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process.  The Company uses multiple models including RMS v18.1 and AIR Touchstone v8.2 Catastrophe Modeling software packages to estimate the Company's probable maximum loss. These exposures are a combination of personal and commercial property risks. The major concentration of losses is in the Midwest			
6.3	What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?  The Company purchases catastrophe reinsurance with an occurrence limit of \$900 million excess \$200 million with no co-participation. For occurrences from \$1.1 billion to \$1.3 billion, we have coverage for 67% of losses. Additionally, there is a program feature which provides coverage in excess of \$250 million in aggregate catastrophe losses. This feature provides \$75 million of coverage, subject to 23% co-participation, that may respond either to an event that exceeds \$1.1 billion or to events in excess of \$250 million in aggregate catastrophe losses. The catastrophe losses subject to the aggregate feature are limited only to those catastrophe losses that exceed \$5 million of incurred losses per event and are subject to a per occurrence limit of \$200 million.			
6.4	Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence?	Yes [	] N	o [ X ]
6.5	If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to unreinsured catastrophic loss.  The Company cedes 100% of its business to CICA.			
7.1	Has this reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss ratio cap, an aggregate limit or any similar provisions)?	Yes [	] N	o [ X ]
