#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

  - (4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

These factors are applied to all securities.

#### NOTE 20 Fair Value Measurements

Α

- (1) Fair Value Measurements at Reporting Date
  - (a) There were no assets carried at fair value at the end of the reporting period.
  - (b) There were no liabilities carried at fair value at the end of the reporting period.
- (2) The company does not have any Level 3 assets or liabilities measured at fair value at the end of the reporting period.
- (3) The reporting entity's policy is to recognize transfers in and transfers out as of the actual date of the event or change in circumstances that caused the transfer.
- (4) For fair value measurements categorized within Level 2 of the fair value hierarchy, fair values of bonds are obtained by a quoted market price if available, otherwise, fair values are estimated using independent pricing sources or internally developed pricing models using discounted cash flow analyses.

The Company utilizes a third party pricing service for the valuation of the majority of its fixed maturity securities and receives one quote per security. When quoted market prices in an active market are available, they are provided by the pricing service as the fair value and such values are classified as Level 1. Since fixed maturities other than U.S. Treasury securities generally do not trade on a daily basis, the pricing service prepares estimates of fair value for those securities using pricing applications based on a market approach. Inputs into the fair value pricing applications which are common to all asset classes include benchmark U.S. Treasury security yield curves, reported trades of identical or similar fixed maturity securities, broker/dealer quotes of identical or similar fixed maturity securities and structural characteristics of the security, such as maturity date, coupon, mandatory principal payment dates, frequency of interest and principal payments and optional principal redemption features. Inputs into the fair value applications that are unique by asset class include, but are not limited to:

- U.S. government determination of direct versus indirect government support and whether any contingencies exist with respect to the timely payment of principal and interest.
- All other governments estimates of appropriate market spread versus underlying related sovereign treasury curves dependent on liquidity and direct or contingent support.
- Corporate bonds, which are included in Industrial and miscellaneous bonds overall credit quality, including assessments of the level and variability of: economic sensitivity; liquidity; corporate financial policies; management quality; regulatory environment; competitive position; ownership; restrictive covenants; and security or collateral.
- Municipal bonds, which are included in States, territories and possessions; Political subdivisions of states, territories and possessions; and Special revenue
  and special assessment obligations overall credit quality, including assessments of the level and variability of: sources of payment such as income, sales
  or property taxes, levies or user fees; credit support such as insurance; state or local economic and political base; natural resource availability; and
  susceptibility to natural or man-made catastrophic events such as hurricanes, earthquakes or acts of terrorism.
- Residential mortgage-backed securities, U.S. agency pass-thrus and collateralized mortgage obligations ("CMOs") which are included in U.S. governments
  and Special revenue and special assessment obligations estimates of prepayment speeds based upon: historical prepayment rate trends; underlying
  collateral interest rates; geographic concentration; vintage year; borrower credit quality characteristics; interest rate and yield curve forecasts; government
  or monetary authority support programs; tax policies; and delinquency/default trends.
- Residential mortgage-backed securities, non-agency CMOs, which are included in Industrial and miscellaneous estimates of prepayment speeds based
  upon: historical prepayment rate trends; underlying collateral interest rates; geographic concentration; vintage year; borrower credit quality characteristics;
  interest rate and yield curve forecasts; government or monetary authority support programs; tax policies; delinquency/default trends; and severity of loss
  upon default and length of time to recover proceeds following default.
- Commercial mortgage-backed securities, which are included in Industrial and miscellaneous bonds overall credit quality, including assessments of the
  value and supply/demand characteristics of: collateral type such as office, retail, residential, lodging, or other; geographic concentration by region, state,
  metropolitan statistical area and locale; vintage year; historical collateral performance including defeasance, delinquency, default and special servicer
  trends; and capital structure support features.
- Asset-backed securities, which are included in Industrial and miscellaneous bonds overall credit quality, including assessments of the underlying
  collateral type such as credit card receivables, auto loan receivables and equipment lease receivables; geographic diversification; vintage year; historical
  collateral performance including delinquency, default and casualty trends; economic conditions influencing use rates and resale values; and contract
  structural support features.

Generally, all prices provided by the pricing service, except actively traded securities with quoted market prices, are reported as Level 2.

The Company holds privately placed corporate bonds and certain other bonds that do not have an active market and for which the pricing service cannot provide fair values. The Company determines fair values for these securities using either matrix pricing or broker quotes. The Company will use observable market data to the extent it is available, but is also required to use a certain amount of unobservable judgment due to the illiquid nature of the securities involved. Additionally, the Company may obtain nonbinding broker quotes which are reported as Level 3.

Coverage is provided for catastrophe losses from named tropical storms or hurricanes, including all events or perils directly resulting from such storm or storm system, which may include, by way of example and not limitation, hurricane, wind, gusts, typhoon, hail, rain, tornadoes, cyclones, ensuing flood, storm surge, water damage, fire following, sprinkler leakage, riots, vandalism, and collapse. The reinsurance agreements meet the requirements to be accounted for as reinsurance in accordance with the guidance for reinsurance contracts. In connection with these two reinsurance agreements, effective July 1, 2023 ("2023 Agreement") and July 1, 2022 ("2022 Agreement"), Commonwealth Re issued notes (generally referred to as "catastrophe bonds") to unrelated investors for an aggregate principal amount of \$300.0 million, consistent with the amount of coverage provided under the reinsurance agreements as described below. The proceeds have been deposited in a reinsurance trust account. |       |   |      |     |
